Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/671,081

Applicant(s)

JANAKIRAMAN ET AL.

Examiner

Steven B. Theriault

Art Unit

2179

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10/28/2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-2, 5-7, 10-12, 15-16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-2, 5-7, 10-12, 15-16 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This action is responsive to the following communications: Arguments filed 04/24/2007.
2. Claims 1 -2, 5-7, 10-12, 15-16 are pending in the case. Claims 1, 6, and 11 are the independent claims. Claims 3-4, 8-9, 13-14 are the cancelled claims.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/28/2007 has been entered.

Specification

3. In light of the applicants amendment to the specification the previous objection is now considered moot, as there is a clear antecedent basis for the terms relied upon in the claim.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. **Claims 1 -2, 5-7, 10-12, 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Challapali et al. (hereinafter Challapali) U.S. Publication No. 20020194006 filed Mar. 29, 2001, in further view of Brown et al. (hereinafter Brown) U.S. Publication No. 20040001090 filed June 27, 2002.**

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art only under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 103(a) might be overcome by: (1) a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not an invention "by another"; (2) a showing of a date of invention for the claimed subject matter of the application which corresponds to subject matter disclosed but not claimed in the reference, prior to the effective U.S. filing date of the reference under 37 CFR 1.131; or (3) an oath or declaration under 37 CFR 1.130 stating that the application and reference are currently owned by the same party and that the inventor named in the application is the prior inventor under 35 U.S.C. 104, together with a terminal disclaimer in accordance with 37 CFR 1.321(c). This rejection might also be overcome by showing that the reference is disqualified under 35 U.S.C. 103(c) as prior art in a rejection under 35 U.S.C. 103(a). See MPEP § 706.02(1)(1) and § 706.02(1)(2).

In regard to **Independent claim 1**, Challapali teaches a computer-implemented method of communicating ~~emotional aspects associated with a communication session from a first person to a second person, said method comprising the steps of:~~

- Receiving an emotional state indicator output from automatic one or more emotional characteristic indicators from at least one emotional content analyzer performed on said of a communication session from [[said]] a first person to a plurality of recipients, wherein

each recipient is to receive a copy of said communication session (See Para 009, 0011, 0020-0025). Challapali teaches a chat system with a plurality of recipients, where each person has the same software and hardware and content is analyzed and presented to the chat participants in the form of an emoticon where the emotion is represented as a facial expression.

- For each recipient, determining an appropriate emoticon or other symbol to reflect said emotional state (See figure 2 and 3). Challapali teaches that each person facial movements are expressed through the chat system as they respond to the content in the chat window. Challapali lists several emotional responses (See also appendix on page 3 and 4).
- For each copy to each recipient, merging said emoticon or symbol into said communication session copy (See Figure 2 and 3, and Para 0026-0029). Challapali teaches merging the emotion with the text into an emoticon that is shown to all other participants as the user responds (See also appendix on page 3 and 4).
- Presenting said communication session, emoticons, and symbols to each of said plurality of recipients wherein each recipient receives symbols (See Para 0023- 0024). Challapali teaches simulating facial movements and emotions to each of the other users in the interface (See also figures 2 and 3).
~~generating one or more electronic symbols representing said overall emotion, said electronic symbols being interpretable by said second person; and
presenting said electronic symbols to said second person in association with said communication session.~~

Challapali does not expressly teach:

- ~~identifying-retrieving a profile for said first person and said second person; retrieving a plurality of profiles corresponding to each of said recipients; determining an overall emotional state for said first person relative to said first person's identity and said received emotional content analysis results; determining the emoticon or symbol in a manner consistent with each recipient profile and presenting emoticons and symbols to a plurality of recipients consistent with their own profile.~~

However, Brown teaches a process of relating a user profile to a response to content in a chat system where the system can present a symbol or emoticon based on the user profile to all of the recipients on the message (See Brown Para 00350051, 0063, 00650073-0074, 0082 and 105-106). Brown teaches the content can be provided through graphics, sounds, video and avatars that can make gestures. Brown and Challapali are analogous art because they both teach a process of expressing emotion in communications between users. They both address the problem of conveying emotion in email or chat where the true meaning of the context of the message is sometimes misunderstood.

Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention, having the teachings of Brown and Challapali in front of them, to modify the system

of Challapali with the system of Brown to present the emoticons of Challapali to other participants based on a user profile. The motivation to combine Brown with Challapali comes from the suggestion in Brown that graphical elements can be used to indicate reaction responses that include text, graphics, icons, images and sounds, as is known in the art (See Para 0030). Further, Brown teaches the content of the communications may include text, icons, video, graphics and avatars gesturing (See Para 0033 and 0068), which is a specific example of the emoticons that provide facial expressions proposed in Challapali.

With respect to **dependent claim 2**, Challapali teaches the computer-implemented method wherein said step of receiving output of emotional content analysis comprises receiving the results of a process selected from the group of a hand gesture recognizer, a body movement recognizer, a voice pitch analyzer, and a facial expression recognizer (See Challapali Para 005, 0011 and 0020-0025). Challapali teaches presenting content that has been analyzed by the system through a facial expression and presents to the other chat users the emoticon and text related to the response (See also figure 2 and 3 and Para 29).

With respect to **dependent claim 5**, Challapali teaches a computer-implemented method wherein said step of generating one or more electronic symbols corresponding to said overall emotional state comprises generating an electronic symbol selected from the list of a text-based emoticon, a graphical emoticon, a text highlight method, a text size change, a text underlining method, a text bolding method, one or more signals for a Telephone Terminal for the Deaf system, and a Braille code (See Para 0031, Challapali shows the list of text and graphical emotions that will be shown to the plurality of users).

In regard to **claims 6, 7, and 10**, claims 6, 7 and 10 reflect the article of manufacture comprising computer readable instructions for performing the method steps of claims 1, 2 and 5, respectively, and are rejected along the same rationale.

In regard to **claims 11, 12, and 15**, claims 11, 12 and 15 reflect the system comprising computer readable instructions for performing the method steps of claims 1, 2 and 5, respectively, and are rejected along the same rationale.

With respect to **dependent claim 16**, Challapali teaches the system wherein said symbol merger is configured to merge a communication session selected from the group of an electronic mail message, an online text chat, a video conference, an online classroom, a captioned television broadcast, a multimedia presentation, and an open captioned meeting (See Para 005 and 017, chat system).

Response to Arguments

Applicant's arguments with respect to claims 1 -2, 5-7, 10-12, 15-16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

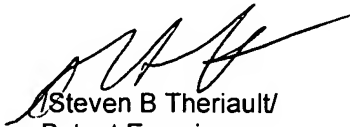

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US. Patent Publication **US 20010029455 A1, to Chin** *method and apparatus for providing multilingual translation over a network*, that discloses the use of a profile to determine the response, sent to other users.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven B. Theriault whose telephone number is (571) 272-5867. The examiner can normally be reached on M, W, F 10:00AM - 8:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Weilun Lo can be reached on (571) 272-4847. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
